

**IN THE SPECIFICATION**

**On Page 8, please amend the paragraph beginning on line 3 as follows:**

- C1
1. A team of health care experts defines a set of elements representing the work carried out, such as care pathways with a model of patient care 12 using a business modeling tool 14; and the models are published in HTML format using the "MooD Web Publisher", which uses the unique identified of each process as the basis for the process's URL. An example is the model of 'Care Planning and Delivery' as shown in Figure 2.

**On page 8, please amend the paragraph beginning on line 9 as follows:**

- C2
2. A team of software developers develops a set of browser-based support software application and information components ~~applications~~ to implement the behavior required by the processes developed in step one. Figure 4 depicts an example of a "Find Patient" Form 16 which can be used to list all patients recorded in a particular database matching a certain surname.
